PERSONAL PROJECTS

E-commerce platform using Angular | Github

- MEAN stack e-commerce project with dynamic product tables, dashboard, and cart management for an enhanced user experience.
- Implemented secure authentication for administrators and users.

My Portfolio using React| Github

- Created a dynamic and visually appealing portfolio using React, showcasing my skills in web development and highlighting a diverse range of projects.
- The portfolio demonstrates a proficiency in building interactive and responsive user interfaces.

GOT Quotes | Github

- Angular project features fetching random quotes from an API, displaying them in a card view, and a reactive form

EngrHireBD | Github

- Construction freelancing platform with streamlined communication, tailored bidding, and secure transactions.
- Simplifying processes, building trust, and fostering career growth.

EXPERIENCE

Industrial Attachment
SELISE Digital Platforms | Duration: 10 days

During my 10-day industrial attachment at SELISE, delving into software development with a focus on the MEAN stack. Created an e-commerce project, showcasing the ability to turn theoretical ideas into real-world applications.

Programming

Solved 400+ problems in different Online Judges (Leetcode,Codeforces,Hackerrank,Codechef,etc) and participated in 20+ contests.
